Sequence 104, Application US/09338933

Patent No. 6488931

Patent No. 6488931

GENERAL INFORMATION:

APPLICANT: Mitcham, Jennifer Lynn

FITTLE OF INVENTION: COMPOSITIONS AND METHODS FOR THERAPY OF

TITLE OF INVENTION: OVARIAN CANCER

FILE REFERENCE: 210121.462C1

CURRENT FILING DATE: 1999-06-23

CURRENT FILING DATE: 1999-06-23

NUMBER OF SEQ ID NOS: 312

SOFTWARE: FASTSEQ for Windows Version 3.0

SEQ ID NO 104

LENCTH: 441

TYPE: DNA

ORGANISM: Homo sapien

US-09-338-933-104
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ; TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR THE THERAPY AND FILE REFERENCE: DIAGNOSIS OF OVARIAN CANCER

VBCTOR: pBACG3.6
Sequence Quality Assessment:
This entry has been annotated with sequence estimates computed by the Phrap assembly program.
All manually edited bases have been reduced to quality zero.
Quality levels above 40 are expected to have less than 1 error in
